First name: Joel

Last name: Wallin

Organization:

Title:

Comments: Please reconsider this plan. As a climber and a family member, I wish to safely recreate. We take enough risks as it is. Bolted anchors are easily camouflaged, provide safe belays; where otherwise an anchor could be potentially threatening everyone attached, and reduce the amount of SAR missions. Keeping people safe by changing a word isn't much to ask is it? Instead of "permanent installation" consider calling them what they are "fixed anchors."
