Comments: I object to allowing outfitters more days to guide hunts on all lands. Opening up more days for outfitters does more harm than good. It's more pressure on the animals that are being hunted and the ones not being hunted. Outfitters have made a massive impact on private land hunting by paying for access and shutting out locals like myself who hunt to provide 90% of the meat for my family of four. Outfitters already get enough options. This is only hurting the herds.
