Last name: Smith

Organization:

Title:

Comments: I strongly oppose 255A on the grounds it is on an active grazing allotment.

This would need to be fenced to keep the cattle out of danger.

The access road has been decommissioned for years as it is in horrible condition.

It would require a major effort and expense to make it accessible for vehicles.

Also a cattle guard would be required.

I oppose Wilkerson Pass mainly on the account it is the direct migration for Pronghorn.

They have used this path for years.

My pick for the project is near the intersection of 90 and 92.

Webb Smith
