Title:

Comments: "I wholeheartedly endorse the efforts of the Access Fund and the Black Hills Climbers Coalition in preserving climbing access and advocating for responsible bolt placement. Their dedication to maintaining climbing access and environmental conservation is crucial, and I stand behind their initiatives."

Climbing is a sport that is very special to me, It allows me to challenge my strength, to be outside and find community with my fellow climbers. Climbing is a very low impact sport on our land compared to most outdoor activities. I hope you take mine and all the other BH climbers opinions into consideration.
