Comments: I would appose any increase in priority use days in the Beaverhead-Deerlodge National forest region. I would support capping the priority use permits at the 2009 level where they are presently permitted. Wildlife and fishery's in the this forest region are clearly under stress at present commercial use levels. Increases in non commercial use combined with this proposed priority use permit increase will create non necessary conflict. Montana is 70% private lands, let the private lands absorb the future outdoor use increases. Priority use permits are a salable and transferable permit and it sells public land use to individual or corporation. Thank you for the opportunity to respond to this proposal.

John(Jack) Atcheson
