Comments: I strongly agree with your proposed climbing policy. I am also anti chalk.

Fixed gear harms the environment. Degrades the climb. Some crags are not meant for climbing without substantial risk.

People don't understand that climbing is not about conquering. I was head instructor for City of Westminster for 13 years. I heard that word used often. Our was was real rock. Designed by Ed Webster. It closed a few years ago. Founder's preference was plastic.

Need U say more.

Thank you for trying to institute a policy dear to my heart.I

Jayne
