Comments: Hello,

As a concerned citizen urging the government to take effective action in response to climate change, I fully support the withdrawal to protect and preserve cultural, agricultural, ranching, wildlife, air quality, recreational, ecological, and scenic values in the Thompson Divide area of Colorado from potential impacts that may arise from mineral exploration and development.

It's essential to close these federal lands to sale and exchange so that they can be more effectively managed. It's no exaggeration to say that this decision will be consequential for all life on Earth. Please do the right thing and implement this withdrawal.
