Comments: I believe the number of day use is skewed due to covid-19 years. The number of day use has dropped in the last year considerably. I also believe that the forest service does not have the staff for increased over site and use by outfitters. The forest service has trouble now with lack of trail and road improvements and maintenance. A longer and more indeapth study is needed for such a large increase in outfitters. Also 20 years is way to long for a review. The travel plan still has not been complete as of yet. Thanks for your time. Jim
