Comments:

Dear Sir or Madam:

I enthusiastically endorse the proposed environmental impact assessment statement for the above captioned withdrawal project. However, I presume there are provisions in the current written leases for renewing each pre-existing project which would be grandfathered in. I strongly recommend very clear sunset conditions for these existing projects which are grandfathered in. For this purpose, I presume your able attorneys may:

(i) review each lease in this particular land area and

(ii) rely upon a provision in each one that would allow a sunset provision to be enforceable. Unfortunately, without copies of these leases I am unable to provide more specific recommendations on this point.

I also respectfully recommend a clear provision restricting private residential and commercial development (except family ranching and farming) within ten miles of this area, and with current development grandfathered in. I would like to see that private development, such as the unattractive development surrounding Zion National Park, does not restrict the wildlife or spoil the surroundings leading to the park.

Respectfully submitted,

Adrienne B. Naumann, Esq.
