Title:

Comments: Please consider climbing and climbers as an integral part of the wilderness climbing environment, including the continued placement of necessary hardware ensuring that climbers can have access and climb safely. Please note that restricting the establishment of new routes to "existing climbing opportunities" on non-Wilderness lands is unenforceable and will create confusion amongst land managers and climbers. Non-Wilderness climbing management policy should maintain opportunities for new anchors unless and until analyses determine climbing should be restricted to protect cultural and natural resources.

Thank you,

Robert
