RE: Outfitter and Guide Project

Supervisor Timchak,

The proposal to increase outfitter use is broad and lacks specifics. You have failed to mention what specific activities will be permitted and where or when, the proposal makes it impossible to accurately measure the impacts and outcomes of the proposed changes, and therefore impractical to provide adequate comments. This alone should be enough to scrap this proposal, and seems to be in clear violation of the intent of NEPA.

The USFS fails to provide a defensible rationale for this proposal. The existing outfitter use appears to already be over-allocated.

As a user of this forest i'm totally against this crazy increase in outfitters.

I request the USFS adopt Alternative 1: No Action.

Respectfully

joe hundley
