Comments: I find it perplexing how government agencies like this one comes to a F.O.N.S.I. I have taken University classes on C.R.M. Cultural Resource Management and this is the sort of finding the USA usually finds, as their are too often C.O.I.'s Conflicts of Interest in a Capitalistic Society.

How do you expect The People to believe that this specific plan to drill in this area will not really be a Major Finding of a Significant Negative Impact..where is THE E.I.S.?? ENVIRONMENTAL INVENTORY SURVEY. IT IS NEEDED HERE FOR SURE.

Where is the science involved here for the public to see for themselves.

Well I myself do not believe this plan will not effect the area in VERY NEGATIVE WAY..MANY WAYS.

So, I am asking the Administration and the Agency involved to RECONSIDER THIS REVERSE-COURSE TO DRILL, BY ASSURING WITH THE E.I.S. THAT THIS AREA AND THE PLANET DOES NOT GET DAMAGED IN WAYS WE CAN NO LONGER REVERSE. For the wildlife involved as well as ALL OF THE PEOPLE-NATIVE AMERICANS INCLUDED.

Please do NOT DRILL HERE.

Thank you,

Cambria Smith
