Title:

Comments: Prohibiting bolts, new bolt installation, bolt maintenance and bolt replacement activities in the national parks and US forests will result in death.

Bolt removal will result in death.

Requiring assessments of existing bolts by a committee, single person, state agency, etc. will result in death.

Bolts are essential to climbers safety. Thousands of climbers rely on the existing bolts in national parks and US forests every single day. Climbing is becoming more popular and will continue to get more popular.

Do not remove an essential piece of safety, make it difficult to assess and replace that essential piece of safety or make that essential piece of safety illegal.
