Title:

Comments: Climbing can be fine safely and responsibly. Responsible use of fixed anchors help maintain access and safety in the sport. Without these anchors a lot of historic and classic routes will be lost.

As a climber, want to ensure the safe and responsible use of fixed anchors in the areas you take care of remains available to the climbing community. I respect and advocate for the responsible use of Wilderness areas and believe that fixed anchors can be a component of a sustainable Wilderness experience. Please revise your climbing guidance to reflect the practice and precedent of the last 60+ years-that fixed anchors for climbing can be used, replaced, and maintained in designated areas.
