Comments: Please alter your defacto ban on fixed anchors in wilderness areas. As a long time traditional climber and one who values leave no trace ethics, I appreciate the need for wilderness areas. I also understand the practical realities of the need for fixed anchors in some cases as well as the incredibly important safety aspects of fixed anchor maintenance. The draft proposal seems out of touch with the realities of wilderness exploration by climbers. Please modify the current draft to account for reality and not just policy from suits. Thank you
