Title:

Comments: I object to any such activity in our natural home. It was everything I could do to make comments. I have PTSD from my military police service both on active, reserve and national guard

Since moving here after retirement my life has become a living hell. Gunfire occurs at intermittent, unannounced times day and night. I now live exclusively in my home, sometimes with earbuds to drown out the gunfire

I have been a second amendment but what about my peace and quiet? I cannot go outside to sit and enjoy the peace because someone has to fire their weapon (s) at intermittent times, day and night. I can't sleep or even have windows open during the day at times due to the gunfire

For me, it has placed me in the mental health centers at VA facilities in Colorado Springs and Denver. I was on lockdown for a week due to the gunfire approximately a year ago

I'm asking, pleading that the folks who have the power to make changes to this "range" I kindly ask that you consider my needs and the needs of my fellow veterans, first responders and general citizens that are afraid to come forward

Please, please consider the quality of life we will have and the environmental impact of this "range"
