Comments: I am in complete support of saving the Dell creek Forest Park elk feed grounds.

For the elk to survive in western Wyoming they have to be fed on feed grounds! They don't get fed most of the population will die, then with the pressure of wolves on them to they will not rebound and we will not have the numbers we have today. Why Wyoming elk numbers are so good is because we have a strong history of fixing a problem the right way. And that right now is feeding elk and saving the feed grounds!
