Comments: I fully support keeping the feed grounds in Dell Creek and Forest Park running for life. My family had fed elk for over 30 years at Forest Park and it's a necessity.

Elk are here animals. It doesn't matter if they are on a feed ground in the winter or on the mountain in the summer, they will be in a herd.

Disease comes and goes in every species in life, elk and deer are no different. This will pass. government and micromanagement does more damage to everything than it does good.

Please don't let politics and this Biden administration and its sick policies ruin what's good. There's not much good left in the world.
