Title:

Comments: Our forests are heritage: consider historic signal juniper trees spread around Santa Fe which are under threat and the biological diversity that our P&J forests contain.

In the face of climate change we cannot stand by.

I do not oppose for wood cutting or selective logging but they must be managed as Europeans do with the care of forest managers. May these be trained and selected from our best stewards such as our native Pueblo peoples.

Cutting our mature forests would be criminal and concerned citizens will be vigilant.
