Re: Thompson Divide Withdrawl - I oppose any an all new oil, gas or coal extraction in the central mountains. I've seen the oil wells spring up in North Park ruining the unobstructed views, and adding light pollution to an area that I love. Given the USA is pumping record amounts of oil now - largely for export! (14m barrels a day?) - and the fact that we need to clearly push for more renewable transport (elec, hydrogen) - let's not keep ruining our back country to support the profit of a few, that won't benefit us in any significant way.
