Comments: The proposal could destroy rock climbing in the US and I am 100% opposed!

The removal and restriction of existing fixed anchors will result in climbers' deaths. It is not a question of if but only when. It would also create additional hazards for SARs team members all across the country.

You are proposing to destroy some of the most iconic climbing areas in the world and it is a terrible proposal. Areas that have had approved climbing for 60+ years!

Even the details of what you propose don't make sense as you don't have the funding/staff to implement them. Why not work together with the climbing community and create some reasonable guidelines to protect the wilderness areas we all love.
