Comments: Hello my name is Sam Roehrich and I am an avid climber living in Tucson, Arizona. Permanent anchors allow me and my community the opportunity to safely enjoy the outdoors. Recently in our area there have been massive re-bolting efforts to restore old crags back to modern safety standards which as a result has reduced the over-crowding at other, more popular cliffs.

By removing our ability to provide safe hardware and access to safe climbing you begin to jeopardize our ability to enjoy the outdoors.

I hope we can come to a resolution on this that allows all advocacy groups the equally share and respect the land around us.
