Title:

Comments: The Forest Service and BLM should recognize that hunting, fishing, ranching, and recreation in the Thompson Divide area support nearly 300 jobs and \$30 million in annual economic output for local communities. These sustainable uses should be prioritized over the destructive practices of mining and fossil fuel extraction on our publicly owned lands.

The proposed Mineral Withdrawal would protect 225,000 acres of public lands from future oil and gas leasing, as well as mining. Benefits to air quality, wildlife habitat, watersheds, wilderness corridors, and our climate would be immediate and economically beneficial to all of the affected local communities.
