Comments: Please do not pass this proposal. I'm sure there are enough comments that will explain in more kind words than my own as to why this is not only unnecessary, but also a terrible use of national park/Forrest resources. A lot of people care with all of their heart about climbing, the climbing community and the land they climb on. As citizens and human beings who live on this land we all deserve a say when there is something potentially being taken away from us. My message from me personally to you is please do not do this.
