Title:

Comments: Please, please continue to allow fixed anchors in National Parks and Wilderness areas. If fixed anchors are made illegal then peaks like the Grand Teton and world renowned walls like El Capitan in Yosemite will never be climbed again. The very best climbers in the world use fixed anchors on these peaks and walls. It doesn't make sense to effectively outlaw technical climbing.

Please preserve our access to public lands and our wilderness areas for historically significant activities such as climbing. Climbing mountains is a noble endeavor and is a compatible and fitting activity in our wilderness.

Thank you so much for your consideration
