Comments: I agree with all of the Access Fund's comments on the issue and will paste some of them below for reference. Please take this comment into consideration. Thank you.

Restricting the establishment of new routes to "existing climbing opportunities" on non-Wilderness lands is unenforceable and will create confusion amongst land managers and climbers. Non-Wilderness climbing management policy should maintain opportunities for new anchors unless and until analyses determine climbing should be restricted to protect cultural and natural resources.
