Title:

Comments: Please do not ban bolting. Climbing does no harm to our environment and people getting outside and enjoying nature should be encourage rather than discouraged. Climbing has literally saved my life. Banning bolting would make climbing so much more dangerous and educated associations would no longer monitor and install bolts. People who have no idea what they're doing would bolt and some perhaps done incorrectly and result in death. Bolts keep climbing safe. Please don't make bolting illegal.
