Comments: Thank you for the opportunity to object to the Nez Perce-Clearwater Final Environmental Impact Statement and Draft Final Forest Plan #44089. I object to the preferred alternatives proposed management of the Hoodoo Roadless Area and the plan's lack of wildlife standards for wolverines and mountain goats.

The Forest Service should manage the entire Hoodoo Roadless Area (151,874 acres) as Recommended Wilderness. The Hoodoo Roadless Area provides important habitat for many sensitive species, especially near the Stateline, where this plan proposes removing sections of Recommended Wilderness.

Prohibiting winter motorized use in the Great Burn is critically important, as research has found that this use can detrimentally impact wildlife behavior and winter habitat. Additionally, the Forest Service must add binding wildlife standards to the forest plan to ensure species survival into the future.

I have not written before but too much is at stake to omit 40000 acres near the state liking where some species live and you are neglecting. What is the purpose of omitting that much territory. Wolverines are now protected and its apparent that you are it not aware of your job. This is vital area for many species. This should not be ignored and its Vidal that you rework your plan abd include the IBnd

Thank you for considering my objection.
