Title:

Comments: This is a scary proposal that puts climbers and climbing at risk. We climbers cherish our wilderness areas and we deeply value our use of them for recreating. Please, do not take this extreme step which jeopardizes our cooperative enjoyment of these public trusts. Instead, work with us and with our stewards to maintain a safe and sustainable usage. There is no need to introduce bureaucracy into this relationship that has done quite well with self regulation for many decades. Work with us, not against us. We're here to help.
