Comments: I am deeply saddened to hear that bolts will be banned in wilderness areas. I have traveled across the united states to recreated in wilderness areas all while leaving no trace while pursuing my main, favorite sport... climbing. I dont understand why we can still camp, follow trails, ski, and have fun but we cant climb safely. Bolts provide more safety than trad gear and have made climbing a popular sport. I believe that climbing and protecting wilderness are not separate but can be done together just like many other outside sports. I dont understand why this is being done.
