Comments: Terrible idea I do not support. The national forest is an absolute joke. Saying they protect land while actively leasing it to oil companies. Encouraging terrible users groups like four wheelers through projects like the Daniel Boone back country byway. This abhorrent user group destroys the forest and is terrible for the climate and the user groups are horrible stewards of the land as they leave there trash everywhere. The national forest is a joke why don't you do something decent with our tax dollars and not pass this terrible proposal. Certainly not holding my breath. Shame, shame,shame
