Comments: I am concerned by the NPS and USFS proposed policies that would prohibit the fixed anchors in Wilderness areas. As a nurse and a climber my top priority is safety. In healthcare, we talk about never events, an event that has catastrophic consequences that is also preventable and hence should never occur. I am afraid the proposed policies would cause never events in climbing in wilderness areas because of laws prohibiting necessary maintenance on anchors. The existing climbing policies and the Wilderness act allow for the necessary safety maintenance. I believe the NPS and USFS proposals are risking human lives. The NPS and USFS will be responsible for the never events that occur if these policies pass.
