Comments: Hello, I'd like to advocate for the change in language to these proposals to allow the use, maintenance, and replacement of fixed Climbing anchors. As a member of the climbing community, I've always sought to be a steward of the environment and the sometimes very delicate environments that we as climbers recreate in. I believe this ethos to be a core part of climbing. The proposals herein are turning down a path which leaves users of these shared areas at risk of harm to both themselves and the areas they climb in from lack of safe and maintained climbing anchors. I believe that climbing, including the use of fixed anchors, can be a part of an overall strategy for land management and protection while allowing the safe use of these areas by all recreators.
