Comments: From what I understand slowing the spread of CWD is the primary reason for the proposed closure. I oppose this action while a viable solution is found. Arkansas (where I live) has been dealing with CWD for years in the elk and whitetail herd. So many steps taken by the AGFC penalize hunters more that stop CWD . Banning scent lures and feeding stations ignores the behavior of deer and their interaction. CWD continues to spread. I hope that Wyoming would consider alternatives to this closure. As for the highway issue...self correcting. Slow down!!!!

Hoping to hunt elk in Wyoming when I get enough points.
