Comments: It is an absolute mistake to even think about closing the elk feedgrounds as this will decimate the herds for the future when there is other options to protect said disease from spreading. Qqqq People need to slow down get of phones and fix headlights when driving to avoid collisions with elk who may have gathered in the winter around said roads. I've hunted 35 years killed elk almost every one of those years and never have I had CWD in the elk. Had many of them tested and checked at stations. Removing the feed will decimate the elk as they have no where else to go and likewise farmers can vaccinate their herds to avoid any type of disease that could spread if there were any. Elk are a foundation of the past just like Bison and they need our help to continue to live on for generations to come. Do not close these grounds and continue the permit!
