Comments: As a non-resident point holder for elk in Wyoming I strongly oppose the closing down of the feeding grounds! The science on CWD is not substantial enough to back up these measures in question...it has been around for 70+ years and has not done what they "experts" claim it was going to do, so why change tactics now? Furthermore, as a United States citizen those elk are "our" public resource, just as the Forest ground they're being fed on. Nothing but good has come out of the past from feeding, so on that note I again am strongly opposed to closing down the feeding program.
