Comments: The current proposal fails to protect old growth forests. The proposal needs to ensure:

1. A complete ban on logging. We have less than 4% of our old-growth forests left. No logging should be allowed.

2. Additional protections for mature forests (second growth) = again, no logging.

New policies must protect ALL old-growth forests and ALL mature forests of our national forest system.

I can't tell you how awful it is to go to Allegheny National Forest and see all of the logging there and the fracking and oil/gas damage. This HAS TO STOP!
