Title:

Comments: Hello,

I am a member of several conservation organizations with the intent on conserving our natural environment to maintain a healthy, natural ecosystem, preserve that for the future and help combat climate change. Old growth forests are one the few remaining bastions that naturally cleanse our environment of harmful toxins and provide clean oxygen. Therefore, I strongly urge a prompt end to all commercially-driven logging in "old-growth" forests and advocate for protection to all "mature" forests as well. Thank you.

Jerry Anderson
