Title:

Comments: Prohibiting fixed anchors will create unnecessary and deadly consequences, restricting access to fixed hardware will have the same unnecessary and deadly consequences. These proposed changes come with no funding, this will place an unnecessary and unsustainable management burden upon the already short-staffed Forest Service & Park Service. USFS, NPS and climbing communities have worked together peacefully for decades. The climbing community in Southern Arizona is dedicated to stewardship, giving back to the community, spread leave no trace practices and recreating responsibly, which will no longer be possible without access to safe bolting systems.
