Title:

Comments: I think taking away either of these two feed grounds would be very unwise, and very detrimental to the elk population, hunting, and livelihood of this area. If we want a healthy population of elk to nourish residents and provide hunting opportunities for in state and out of state residents. I believe these feed grounds are crucial to not only the elks livehood but also the Forest Service and Wyoming Game and Fish.

Question:

Where do you propose the elk will travel to in order to get to food if these are taken away? Will they be going over more road ways to get to food, and how many people and elk will be killed in the process?

Thanks for your consideration.
