Comments: Hello,

I'm writing because I DO NOT support USFS prohibiting fixed anchors in rock climbing areas. They are an important part for safety in rock climbing. I also feel that any form of federal oversight in the establishment/maintenance of fixed anchors will create unnecessary layers of beauracrazy and complexity which will only serve to hurt climbers in the end. Additionally I am of the opinion that any regulations made will ultimately be unenforcable and a waste of taxpayer dollars anyway due to the sheer amount of land that this policy aims to "govern".

Thank you for your time,

Adam R.
