Comments: I lost the email from November about the comment period for the proposed shooting areas in the PNF. I see the comment portal is closed. I thought I would send an email.

I am a USDA permit holder and have a summer cabin in the Crystola Summer Home Group. None of the proposed shooting locations will affect my property, but I am very concerned about the project.

To be clear, I am not generally opposed to target shooting ranges, but when I read about the proposal, the first concern I had was noise. I think most people enjoy the mountains, and nature in general, for the peace and tranquility, which would be forever ruined by daily repeated gunfire. I would only support this project if the proposed areas were far away from homes, summer homes, campsites, hiking trails, etc. This is especially important to property owners who do not have the ability to change location and escape the noise. And let's not forget to mention the negative effect on property values.

Thanks for listening.
