First name: Tom

Last name: Anderson

Organization:

Title:

Comments: It is critical that We allow fixed anchors in wilderness areas. I have been climbing all over the United States and Europe for 52 years. First, it is critical that We allow and the maintenance of fixed anchors for the safety of the climbers involved. Second, This is and always been and accepted practice with many historic and revered routes that should remain and be maintained for future generations of climbers. Sincerely, Tom Anderson
