Comments: God is watching!

We must conserve old-growth forests. The survival of humanity depends on emergency climate action. Future generations are depending on you!

Old-growth forests are absolutely vital for a number of important reasons, including wildlife habitat, freshwater storage, and erosion control. And they are essential to mitigating the impacts of climate change, as old-growth forests absorb massive amounts of carbon dioxide from the atmosphere through photosynthesis, and store it safely underground in root systems.

No more cutting of old-growth forest! We must dramatically expand old-growth forests!
