Comments: Regarding the draft policy released and it's classification of climbing anchors.

Prohibiting fixed anchors will create safety issues by imposing unnecessary obstacles to the regular maintenance of fixed anchors, a responsibility undertaken by the climbing community. Critical safety decisions often must be made in the moment and any authorization process should not impede those decisions. Fixed anchor maintenance needs to be managed in a way that incentivizes safe anchor replacement and does not risk the removal of climbing routes.

Please involve climbers when creating the final draft that will create a fun, safe and sustainable future for our wilderness.
