Comments: I support these changes.

I have traveled the united stated and other countries, I can honestly state that Alaska if the most beautiful and diverse land that I know and love. It is not the land itself that makes it so, but the people that are a breed of their own. Not many can and do live off the land and love it so much. It is a way of life that if we do not support it, it will be lost and gone forever. Alaska will lose its unique way and people. People will come that do not appreciate, love, respect and take care of her, she will be lost forever. Please support these changes so that the people that will love her for generations can be her guardians.
