Comments: I fully support all parts of this trail proposal. These projects are well thought out and needed. I am familiar with most of these trails and have seen firsthand the erosion caused by steep slopes. The trails identified to be improved for cross country skiing are currently too steep to ski with touring gear. These proposed actions will make the trails more enjoyable, safer, and help prevent resource damage in all seasons of use. Also, the grooming partnership between the Pintler District and the Echo Lake Trails Association has allowed many beginner and intermediate nordic skiers to enjoy skiing. The addition of trails adjacent to this system as well as at the Sawmill trails will allow more opportunities for skiing and disperse people on the trails.
