Target Shooting Management

We own and live on 40 acres on County Road 78, Woodland Park, which is across from FR 34, that would be the west side of Turkey Tracks shooting range. We get all the overflow from that range. The come down FR 343, all the way to County Rd. 78, directly across from our property. We listen to constant shooting all weekend. We can no longer enjoy being outside or having a door open.

We have had a stray bullet whiz by us standing by our garage. We called the Teller County sheriffs dept. and the forest service on this. We have reported a fire when a shooter hit the power line to go down and started a fire. We have sent a email on problems and called in complaints on illegal targets and other things to Jennifer DeWoody in the past.

Jake Ellsworth with the forest service did come out and agreed with findings, which my husband showed him, that we were in the crosshairs. A band aid was put on that, also some signs were put up that says parking area, shoot low. Really same effect as pack your trash!!! When is enough enough. Shut down the west side of turkey tracks to shooting. Please.

(overflow-side)
