Title:

Comments: I can't see it much matters as for the most part, the Eastern forest is basically off limits due to the "environmentalist" threats of law suits, and extended appeals. We have a rotting forest, and increasing each day. God gave us these trees to be used, not just admired. The 1st chapter if the book of Romans (Bible), God warned us of people worshiping creation more than the Creator. This was no doubt prophetic as 2,000 years ago this wasn't happening. God knew the "worshipers" would come.
