Title:

Comments: As one of the largest, most populous, and wealthiest countries in the world, it is the duty of the United States to combat climate change by protecting the environment. Human beings are part of earth's ecosystem, and we can't just exploit the planet endlessly and expect it not to rebound on us. I fully support a prompt end to all commercially-driven logging in "old-growth" forests, and I also support extending that protection to all "mature" forests as well.
